HONOLULU, July 19, via SAN FRAN-CISCO, July 26.-To-day it was learned positively that the provisional Government's policy and position regarding the future treaty relations with the United States are, and will continue to be, in brief, as follows:

The new treaty drawn, which was a document covering the objections which arose in the United States during the visit of the Hawaiian commissioners to Washington, will not be forwarded. The treaty matter has been fully discussed in special sessions of the councils lately, and the draft of the new treaty has with-in a few days been returned to the committee, which has been indorsed by the Government councils unofficially. The document contains five articles, and is

briefly as follows:
Article I cedes from the date of the exchange of ratification of the treaty, without reserve, all rights of sovereignty in and over the Hawalian Islands and dependencies to the United States, to become an integral part thereof.

Article 2 cedes and transfers the abso-

lute fee of all Government and crown lands, public buildings, ports and harbors, fortifications, military or naval equipments, and all other public prop-

Article 3 provides that the existing Government of the Hawaiian Islands and the laws relating to its internal policy are to be continued for five years, to be executed and carried out under the direction of a United States commissioner appointed by the President and Senate, said commissioner to reside in the Hawaiian Islands, with power to veto with-in ten days any act passed by the local Government, which shall thereupon be-come vold, unless afterwards approved by the President of the United States. Article 4 prohibits the immigration of

Chinese laborers into the Hawalian Islands until such time as Congress shall provide further legislation. It also pro-hibits Chinese laborers now here from entering the United States; otherwise, immigration and labor laws are to remain as they are, where they do not come in conflict with the Constitution of the United States or such further laws as Congress may provide

Article 5 provides that the public debt shall be assumed by the United States, but the Hawaiian Government shall con-tinue to pay the interest thereon, Congress to provide the future currency of

The Government has decided to include the substance of this new treaty draft in instructions to Commissioner Alex-ander and Minister Thurston, who will bring the matter before the United States Government in the form of suggestions in case President Cleveland decides to finally withdraw the Harrison treaty of annexation and determines to substitute therefor a new treaty or some modifica-tions of the old. Professor W. D. Alexander will carry these instructions with him to Washington on the 25th or 27th instant. Will Lilloukalant Be Restored?

SAN FRANCISCO, July 26.-The follow-

Pending the reply further instructions. Pending the reply of President Cleveland the vessels will be kent together, and should the decision of President Cleveland be in substance that the ex-Queen should be restored, marines will be landed, and any attempt on the part of any person to proceed in a rictous manner will be promptly put down. In other words, it is considered highly probable that Lilioukalani will be restored to the throne with the assistance of United States soldiers.
